Moonlight 365 Navigator Product Sheet

Illuminating your path through the technology darkness.

Browse, Search, Preview, Act.
All SharePoint Files in One Dashboard:
Moonlight 365 Navigator

Dashboard for all the SharePoint content you have access to, or toggle to your favorites only!

- **Microsoft Power App**
- **Windows & Mac**
- **M365 & SharePoint Secure**
- **Intuitive and Easy-to-Use**

Finding your files was never this easy!

Centralize browsing, search, preview, and file actions in a single, intuitive workspace. Moonlight 365 Navigator is your all-in-one gateway to Microsoft 365 - securely running inside your tenant and accessible through any browser. Built on the Microsoft Power Apps platform, it is fast, stable, and completely Microsoft native solution, transforming your Microsoft 365 environment into a powerful, modern dashboard. Enterprise grade security is built in, ensuring users only access exactly what they're allowed to - nothing more, nothing less.

Quickly browse content with familiar File Explorer experience, run full-content searches, and sort, filter, preview, download, upload, and open files or emails stored in SharePoint with ease. With native integration across BI Reporting, Workflows, Teams, Planner, and Outlook (OWA), Moonlight 365 Navigator adapts to your workflows - thanks to a fully customizable interface designed around your needs.

Navigator Features for SP Online:

- **Browse to your files**
- **Full Content Search**
- **Sort and Refine files by:**
  - **Client, Department, etc.**
  - **Matter, Project, Folder, etc.**
- **Microsoft Security Applied**
- **Document Preview, Upload, etc.**
- **Fast, Easy-to-Use, Customizable**

A Web Based File Explorer Experience

Searching in SharePoint is expected - but browsing it like a true file system is a game changer. Moonlight 365 Navigator lets you open folders, drill down into their contents, and move through a full tree of your SharePoint sites and files with the ease of File Explorer. Add built-in access to Teams, Planner, BI Reporting, and Outlook (OWA), and you get a single, unified dashboard for everything your team relies on.

Users love Navigator for one simple reason: it just works. It's fast, stable, consistent, and always in sync because it lives inside your Microsoft 365 tenant, securely delivering the Microsoft app data you need — without friction, delays, or surprises.

Easily drill down and find your SharePoint folders and files.

SharePoint search made easy with filters and boolean search.

Secure and Easy to Deploy

Moonlight 365 Navigator is built as a Microsoft Power App, so deployment is fast and completely controlled by your IT team. You decide who gets access, and every approved user instantly gains the full power of Navigator with nothing to install on any device, because it runs entirely in the browser.

Security isn't an add-on; it's inherent. Navigator lives inside your Microsoft 365 tenant, respecting all existing permissions. If certain documents or folders are restricted, Navigator enforces those rules automatically, ensuring your organization's data stays protected and only visible to the right people.
