Moonlight Filer Product Sheet

Illuminating your path through the technology darkness.

File E-Mails, Attachments, Word, Excel, PowerPoint to SharePoint Easily
Moonlight 365 Filer

- MS Office Integration
- Windows & Mac
- M365 & SharePoint Secure
- Intuitive and Easy-to-Use

Simplify Microsoft Office Filing to SharePoint

Moonlight 365 Filer turns Outlook into a powerful filing hub. Fully integrated with Outlook: New, Classic, and Web. It allows professionals to quickly save emails and attachments directly to SharePoint, together or separately, in seconds. No extra steps. No disruption. Just faster, smarter filing right where you work.

Moonlight 365 Filer goes beyond email by enabling one-click saving of Word, Excel, and PowerPoint files to SharePoint—and lets users instantly browse and open SharePoint-saved content directly from Outlook or Office apps. Securely installed within your Microsoft 365 tenant, it combines enterprise-grade security with a clean, easy-to-use interface designed to boost productivity without complexity.

Filer Features with SharePoint:

- Save or Open Word Docs
- Rename Email before Save
- Save Attachments Only
- Microsoft Security Applied
- Filed Email - Indicator
- Fast and No File Size Limits
- Attach Files to Email too!

SharePoint Filing made Easy

Storing your files and digital content in SharePoint isn't just cost-effective - it's one of the smartest moves Microsoft 365 organizations can make. But even the best SharePoint site only delivers value when users can easily get their content into it. Saving emails, attachments, Word documents, Excel files, and PowerPoint directly into SharePoint often becomes the bottleneck for both users and IT teams.

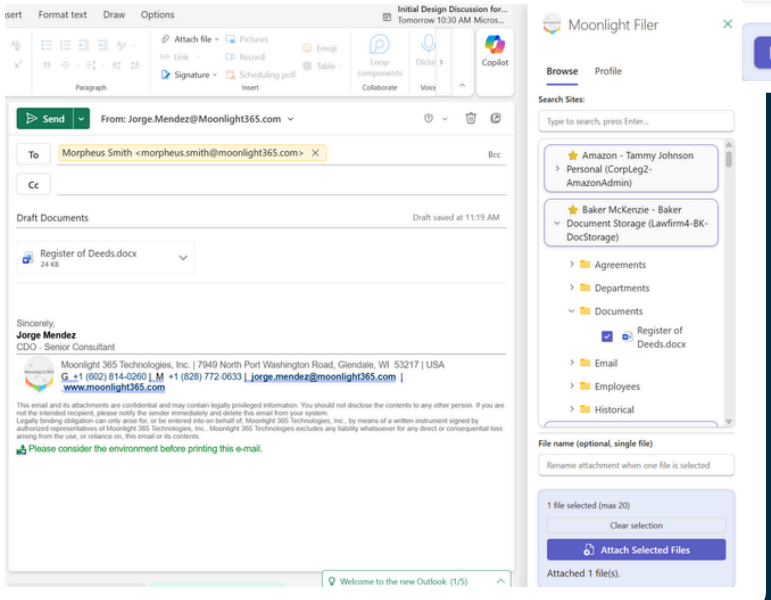

Moonlight 365 Filer eliminates that bottleneck. With fast, intuitive saving directly from Outlook, Word, Excel, and PowerPoint, users can move content into SharePoint in just a click - no extra steps, no learning curve, no friction. It's the simplest, quickest way to turn SharePoint into the efficient, centralized content hub it was meant to be.

Deploy Everywhere Instantly

Roll it out to everyone or target specific users - no local installs, no IT headaches, because it is a Tenant Managed Add-In.

The Filer appears automatically in the ribbon of Outlook, Word, Excel, and PowerPoint across both desktop and cloud versions. Because it works seamlessly on Windows and Mac, your entire organization gets the same fast, unified SharePoint filing experience.

Attach Files to Email

Attaching files directly from SharePoint with the Filer is easy and quick!

Secure & Accessible

Files stored in SharePoint can be accessed only by authorized users. SharePoint sites if configured will automatically apply email or file metadata to content saved to SharePoint by the Filer.
